

Designed to help reduce heat loss

- Low-E double glazing - reduces heat loss by 50-60%
- Argon-filled glazing unit - reduces heat loss by 10-20%

A premium outdoor sauna combining panoramic double glazing, carefully selected sauna timber and a low-maintenance architectural exterior.

The LOCX aluminium frame is extruded in the UK using recycled aluminium. All PANORAMAX components are precision-cut and fabricated in Britain. British designed, engineered and assembled.

PANORAMAX SAUNA

The wide glazed frontage creates an open, view-led wellness experience and connects the sauna with its surroundings.

- Approximately six-person sauna
- Specialist sauna insulation from Finland - 120°C+
- Internal sauna space: 1780 x 2200 mm
- Panoramic Low-E double glazing
- Full-width upper bench - 500 x 2200 mm
- Extra wide lower bench for lounging - 1000 x 2200 mm
- Electric or wood burning sauna heater
- Specialist RGBW Neon silicon strip lighting
- External footprint: 1980 x 2390mm - fits most drop-side vehicles

LOCX FRAME - SAUNA

BUILT AROUND LOCX

Behind the timber and glass is a precision-engineered aluminium frame that distinguishes PANORAMAX from a conventional timber sauna.

- Precision recycled aluminium profiles
- Connector-based construction using stainless steel bolts
- No welding required for the main structure
- Repeatable manufacture - lightweight and mobile
- Different exterior finishes available

LOCX SYSTEM

HEAT, LIGHT AND ATMOSPHERE

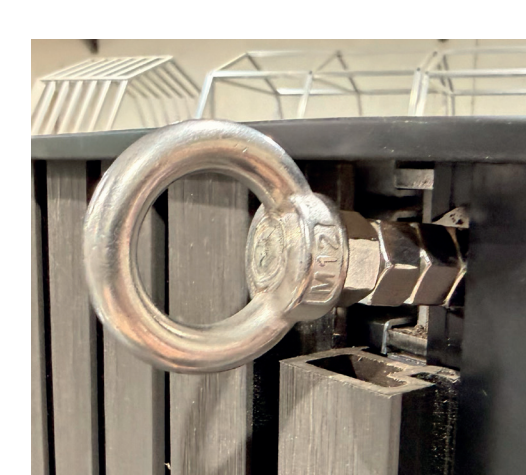

A premium outdoor sauna designed for private gardens, hospitality and wellness settings.

- Electric pillar-style sauna heater
- Dimmable Neon lighting
- Controlled ventilation
- Wood-burning option for suitable sites
